TAMMY R. DOWNS, CLERK

By:

DEP CLERK

I've been moved to Green County Jail. It is a million times better. The medical provider is still turn key but difference like black and white. Wcnc did not send me with all my meds how ever medical staff went above and beyond to make sure I had my meds saying "I can not go with out it" So if medical staff here knew how important it was surely staff a white county did to. I also want to add in the perlong time of not having my meds, or not full doses, and the mishandling of it by wcnc has already taken a effect on me. I'm feeling the effects of virus now more then I ever have, I feel as if I have the flu, I'm super tired, no energy, head ache, my ears are not healing at all, and I'm breaking out. All are signs that the virus is coming back the effects are long and lasting. I can only pray the actions of staff at wcnc have not allowed the virus to become anune to the virus. Sadly the signs point to this being so.
