Cover Letter

TAMMY H. DOWNS, CLERK

By:  DEP. CLERK

The savagely brutal, outrageously cruel and wicked things you are about to read ARE true. They are sick, sad and atrocious, deliberately, purposely done us GROSS negligence is a complete understatement.

In the following pages you are about to read, you see there are no care to human life, liberty, OR constitutional care. There is a complete nonobservance to the ADA, state OR Federal law. Even the constitution itself is totally disregarded.

You're about to read how inmates are forced to defecate in a grated hole in the floor. and then must push it through with their hands OR feet. Then not allowed to wash for days at a time. OR inmates are forced to defecate in food trays then send it back out due to no toilets in cell.

The unconstitutional treatment continues with Bibles not being allowed OR bans on things "like" "Our Daily Bread" OR books about the "Holy Ghost" Legal mail is thrown away 1983 forms are denied even adequate and constitutionally required medical and life saving care is denied.

This case assigned to District Judge Rudofsky
and to Magistrate Judge Moore

There is no regard to 1st Amendment the 8th, 14th or any Rule of law.

Christian publications are stripped from us medication is mishandled, even administered to the wrong inmates, improper administration is a daily occurrence.

- Drinking water is withheld from us
- No emergency grievance system
- No "Due Process" with legal mail
- Legal mail, incoming & outgoing thrown away
- Administrative grievances are ignored or the appeal is answered by the same person.

The tragic list is long and sick, please copy and forward this to:

- 1) Office of Inspector General
- 2) Constituent Services
- 3) The Federal Courts
- 4) Correction Professional Standards
- 5) ACLU
- 6) DOJ OIG or anyone that can help expose the gross negligence or gross unconstitutional treatment.

①

This is a plea for help! I pray the person Reading this can help launch an investigation or get this into the hands of someone that can. Inmates are dying! Some have made the news, some have not, and I now fear for my life! All attempts of contacting any review committee have been blocked by the staff (outgoing legal mail) is thrown away. I have been told I don't / or can't file 1983, officials laugh at me and deny the many request for 1983 forms, asking for them the staff retaliates against me and forced me to sign a release or I would have been locked down, losing all contact with my family.

②

Please help! I've exhausted all unit approved administrative remedies, more over every attempt to file 1983 has been denied or blocked by staff here at White County Detention Center in Searcy Arkansas. The Repeated gross negligence in non adherence to the Constitutional, Federal and state laws. The ADA and the PLRA, the nonobservance of any rule of law has made the unconstitutional treatment pattern of persistent and widespread practices that have become permanent well settled pattern and now normal constitutional violations. Officials are doing this to all inmates not just me. When any inspector comes, the staff does not allow us to speak, if we do we are

locked down and everything is taken from us when he leaves.

To whom it may concern: 8-3-24

This is a plea for help! I pray the person reading this will help this letter get into the right hands...

Inmates are dying! Some have made the news, some have not. God given constitutional rights are deliberately being withheld. If we say anything or file a complaint via the unit approved procedure we are often at times retaliated against or simply ignored.

Some inmates (more specifically) those who are placed on suicide watch and (administrative segregation) are forced to use the bathroom in a grated hole in the middle of the floor, (both urination and defecation) because they are placed in a "Dry Cell" that has no toilet/waste disposal facilities and no water supply. Drinking is withheld as a way of to handle infractions...

Old men are forced to sleep on the nasty floor. Just yesterday, I saw a handicapped man left on the floor crying for help getting up and they would not allow me to help him up or call his wife because he could not reach the phone.

These are just some of the unconstitutional treatment conditions here at White County

④

Detention Center in Searcy, Arkansas.

I've started a log of sufficiently and gross negligence to law rights, ADA & PLRA denials and its growing daily. These are serious instances of gross negligence and indifferent towards basic humane & constitutional rights and these accusations are 100% true and there is plenty of proof.

This all started for me personally when my 1st Amendment right deprived by staff not allowing me a bible. I am also on a life saving med that I have to take daily. The ~~se~~ security and medical staff here are deliberately indifferent of the seriousness of my own medical needs, saying things "Like" your medical needs are all in your head and "You don't have to take meds daily". Or even that my doctor/provider orders are fake and they will do what they want. Security and medical staff have denied my life saving med to myself and others adequate medical treatment on so many levels. They have purposely & continuously ignored medical doctors/provider orders that have already been established. Medical staff ie (unit pill nurses) here have thrown away my medications which cost thousands of dollars per bottle. They have administered my prescribed medication to other inmates on purpose and by mistake. They knowingly mishandled my meds, administering them improperly, making them ineffective by crushing them, breaking the special coating & exposing them to light. This also

⑤

lessens the dosage given, due to particulates left in the bag or in the cup. Thus I receive less medication that has been prescribed by my doctor/provider. In addition, security staff retaliates when I try to pursue administrative remedies via the approved unit grievance procedure (staff refuses to allow me a paper copy of my grievances and the same staff member who answers/makes a ruling on the merits of my grievances procedure is the same staff who responds to my appeals) both are violation of the PLRA and federal laws. Security and medical staff gross negligence and deliberate indifference towards me, via the wrongful and improper administration of my doctors prescribed "life saving meds" is harmful and a threat to my physical well being and life, I lose days and/or years off my life if I don't take these meds properly. I have a wife and three kids and only one year to serve in the Federal B.O.P. but I fear I'm going to die before I make it there. The deprivation of our rights. The officials & staff and medical staff are deliberately indifferent to medical care and needs, the gross negligence is sad and tragic... Please help! or get this to the right person that can help. I wrote the federal courts and asked for Habeas only to have staff here block my outgoing mail. They forced me to sign a medical release form or they were going to lock me down for 23 hours which violates federal laws.

⑥

In males are not safe here and there is no non adherence to state or federal laws. Once again, I pray for help in exposing this unconstitutional treatment. Give a copy to anyone that can help or has the power to look into this matter. We need help in here, people are dying due to direct misconduct of officials here, ADA is being violated, the PLRA is being violated, state and federal laws are being violated.
